DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01 October 2007 has been entered.

Drawings

2. The drawings submitted on 01 October 2007 are objected to because they contain text descriptions below the Figure numbers. In particular, Figures 5-7 have text descriptions: "Particle Distribution in Samples," "General Log Presentation" and "Detail Log Presentation." Only the Figure numbers are allowed, as an example, "Fig. 7" Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be

labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: The instant specification contains unnecessary capitalizations, for example, "Microgranulometry." For purposes of clarity and continuity, appropriate correction is required.

Claim Objections

4. Claims 1-20 are objected to because of the following informalities: The instant claims contain numerous unnecessary capitalizations of claimed limitations (including, but not limited to: Rolling, Gamma, Vertical, Micro, Sonic, etc.). For purposes of clarity and continuity, these need to be corrected. Furthermore, independent claim 12 recites "Microgranulometry" as a single word, as in the instant specification, while independent claim 1 states "micro granulometry." For purposes of clarity and continuity, appropriate correction is required. Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-20 objected to as for minor informalities as pointed out above, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

Objections to the instant drawings, specification and claims pointed out above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
